COVER LIA RIVA

Catégorie : Art

Description

This NFT includes the digital proof and a digital copy of the Forbes Monaco cover featuring Lia Riva published in September 2019.

About Lia Riva: Lia Riva is CEO of Monaco Boat Service, a key player in Monaco's yachting industry that generates €750 million in revenue. Her father Carlo designed the iconic wooden Aquarama that put Monaco on the map as a glamorous international boating destination. Monaco Boat Service believes deeply in initiatives that represent both the boating community and Monaco's environmental agenda, like in the Monaco Solar & Energy Boat Challenge, founded by engineer Marco Casiraghi, which brings together young engineers and experienced shipyards to develop alternative propulsion systems, using only clean energy sources. Riva, who believes "You live not only to earn money, you live to help others," was one of the original supporters of the Nouveau Musée National de Monaco, which is spread over two buildings, Villa Paloma near the Jardin Exotique and Villa Sauber near Larvotto beach, that opened in 2008.

About Forbes Monaco: Since its launch in 2018, Forbes Monaco has promoted a culture of diversity, inclusion and equality in the heart of a unique community of entrepreneurs and philanthropists while maintaining the authoritative voice of journalism that has built the reputation of Forbes Media. As the Principality's leading business media brand in English, Forbes Monaco has a strong commitment to sustainability and responsibility to ensure our content and experiences reflect the discreet audience we serve. As part of the Forbes family, Forbes Monaco's editorial efforts, product, revenue and corporate teams are committed to making this world a better place for all.
